

'Howell TC2' and 'Howell TC3' Red Fleshed Apples

Parentage: Cross of 'Arlie Red Flesh' and 'Honeycrisp'

Description: Pronounced lenticels; solid to mottled reddish-pink flesh color

Flavor: Sweet/tart, almost berry-like flavor; very juicy; crisp

Harvest: First week of October (Oct 7, 2014) in Prosser, WA, USA; Red color in flesh develops after starch dissipates

Storage: Stores well in common storage for at least three months; Very limited long term storage testing done to date
